(Anti-)Piracy & Books: The Flemish integrated approach

Cracow, Polska Ksiazka
12 december 2011

Kurt Van Damme

Managing Director Librius
Head of legal unit Boek.be

Outline

- I. Piracy and books: the phenomenon
- II. The stage and the actors
- III. Piracy in economic/legal terms
- IV. The Flemish 5-track approach
- V. SINBAD: the anti-piracy webcrawler for books

“Where geeks go first, the general public will follow.”

C. Sorrel, Wired

I. Piracy and books: the phenomenon

- Broad definition: every copyright infringement on the net? (too broad)
- Narrow definition: the making available of illegal content on the net (Flemish approach - not: downloading! - major shift)
- Three main sources: P2P, direct download, newsgroups
- Book sector was relatively untouched until Kindle and iPad along
- Some book product types are more vulnerable than others: STM/professional, text books, comic books, audiobooks, bestsellers...
- Ever expanding: 1B searches for illegal books p.a. on Google alone
- Small languages don't escape!

II. The stage and the actors

5

- **P2P:**
 - *BitTorrent, eDonkey, Pirate Bay, ...*
 - exchange of infringing materials (upload - download)
 - P2P site acts as a virtual phonebook
 - worldwide 17M simultaneously connected end users on a daily basis
 - TO: 2-5M USD p.a.
- **Direct Download:**
 - *Rapidshare, MegaUpload, Hotfile, ...*
 - unique download link after upload
 - bigger than P2P in terms of number of users and TO!
 - anonymous
 - highly profitable for hosts (TO: 20-50M USD p.a.)
 - e.g. Megaupload: 28M unique visitors per month
 - multi-upload (software uploads file simultaneously to multiple hosts)
 - revenue sharing programs: uploaders can earn up to 5K USD p.m.
- **News groups: alt.bin**

III. Piracy in economic/legal terms

- whole series of surveys: *Attributor* (US: e-books only 2.8B USD), *Terra* (FR: € 240B in 2015, over 1.2M jobs lost - European creative industry worth € 860B), Germany (2011): 62% of e-book downloads from illegal source
- Hargreaves report UK 2011: methodology of surveys is questionable
- ‘earn-back’ effects (free publicity, incentive to read/buy, ...)?

- but piracy is out there and it’s huge! - that’s a fact
- target group: teenagers, nerds and techies - attitude shift needed so long term approach
- digital natives: ‘digital is cool, paper is school’

- need for high-quality and reasonably priced legal offer (e.g. www.e-boek.org) - it’s the free market out there - ‘innovate or die’

- link with cultural diversity
- legal framework insufficient: enforcement v. e-commerce/privacy/data retention (cf. ECJ *SABAM v. Tiscali / Scarlet* (filtering); *BAF v. Telenet/Belgacom* (Pirate Bay - blocking)) - identification of infringers difficult/uncertain in civil proceedings (ECJ *Promusicae v. Telefonica*; but: ECJ: *L’Oréal v. eBay*: “diligent economic operator”)

- piracy itself is a threefold business model : for *hosts* (subscription), *uploaders* (revenue shares) and *ISPs* (not passive at all: spam, DPI, bandwidth shaping/throttling)

IV. The Flemish 5-track approach

- **Communication:** positive / don't criminalise / leave downloaders alone (they are your (future) customers / long term / Youtube movie for teenagers & awareness campaign for teachers (www.doedekopieertest.be))
- **Legal offer:** www.e-boek.org (ipad app): 110,000 titles available (2011)
- **Lobby and team-up (BAF)** / stress the importance of your sector (*Arthena* survey 2010: copyright related industries in BEL 31B EUR & *OCI* survey Flanders 2011: Flemish print media 4.5B EUR, 3 times the size of the music industry - whole creative sector worth 23B EUR) / inform & train government officials!
- **Technological innovation:** in-the-cloud / *social DRM* / blackhole filtering
- **SINBAD:** push, don't pull / **self-feeding** / under the radar / the internet is huge and what is taken down today reappears tomorrow!

INTEGRATED MODEL

e-boek.org

V. SINBAD: the anti-piracy webcrawler for books

- SINBAD: '*Searching the Internet for Non-authorized Books And Displays*'
- developed by Librius, the CMO of the Flemish book publishers
- Webcrawler: scans on the basis of huge scanning list of known illegal sites - so push, not pull! (crucial) - pull only for specific websites or links - self-feeding (illegal websites found are added to scanning list)
- links BiP metadata (*Boekenbank*) to HYDRA, the BAF webcrawler for music, movies and games
- funding by Librius' Innovation & Development Fund (IO) - start-up phase
- 28 Nov. 2011: European pilot kick-off meeting in BEL with 5 FEP members (several EC units present)

SINBAD

THE ANTI-PIRACY WEBCRAWLER FOR BOOKS

SINBAD workflow

- How SINBAD works in 4 steps:
 - Creation of title database (basis: BiP) & analysis of correct search strings per title (semi-automatic - solution needed for countries with large title production)
 - robot searches for sources (scanning database) & illegal links/websites are subsequently added to the SDB (self-feeding)
 - crawler collects infringing links and corresponding relevant info (illegal link, webpage title, nickname poster, hosting site, hosting company, country ...)
 - Notices are sent to corresponding hosting sites or infringers (take-down / remove)
- Detailed reports are made available at regular intervals (in Excel format at the moment, available in interactive format via online portal site www.librius.com in the near future)
 - Handy for determining *targets for legal action* (e.g. allows you to see which sites hosted by a hosting provider in your country host the most illegal e-book files/links and may warrant legal action or takedown)

Full results Flanders, Belgium

20

- Results: 29,000 files (July 2011 - Boekenbank BiP feed - A-market only)
 - Comic books: 10,154 files
 - Books: 19,064 files
 - No textbooks and STM scanned yet: intranet wall - legal exception - full text search needed for “readers”
 - Average title production Flanders (ISBN) p.a.: appr. 7,500 (Librius title data)
 - Mix of pdf, e-pub, audiobooks, podcasts, ... (digitized and digital-born)
- eBook piracy is most definitely a problem
 - Cf. Flemish movies and TV shows: 12,000 links in total in 2010
- Trends:
 - Comics and best sellers (local & international) are the most popular
 - Lots of “multi-packs” (1 file/link containing 100s or 1000s of books)
 - Files containing entire repertoire of well-known authors
- “Boekenplank”:
 - Site offering thousands of e-books, neatly arranged by author and/or genre
 - Since site only offered infringing content: removal of the whole site rather than notice and takedown
 - After warning letter was sent to site operator, he removed the entire site

Zilverdoorn	58	John Grisham	180
Dochter Van Het Keizerrijk	58	J.R.R. Tolkien	174

European test results

- **Limited scope of the scan**
 - Pro bono for BAF (priority to scans for HYDRA and SINBAD-members)
 - Selection of titles from member states not representative (no sufficient results on the basis of title data provided)
 - BAF made own selection of titles (e.g. on the basis of the Amazon Kindle bestseller list)
 - Full BiP input (batch) required to get the overall picture!
 - However: test results give first indication of scope of phenomenon in member state
- **Results (including audiobooks):**
 - **Poland:** infringing files found for 20 of the 30 titles: 805 files (40 links per title o.a.!))
 - **France:** two dictionaries selected (*Bescherelle V.A.*, *Petit Larousse*): 1,301 links
 - **Finland:** one title selected ('Pudhistus', Sofi Oksanen): 38 links (cf. Polish ratio)
 - **Germany:**
 - *Avaxhome*: 999 links for e-books
 - 4 titles scanned individually (Roche, Carter, Spielberg, Alder-Olson): 304 links (75 links per title o.a. - more mature market)

Poland in detail

- 1 scan based on 30 sample titles:
 - Polish authors (e.g. W. Cejrowski, M. Gretkowska, A. Sapkowski ...)
 - Polish translations (e.g. J.K. Rowling, D. Brown, S. Meyer, S. King ...)
- Results:
 - infringing files found for 20 of the 30 titles: 805 files in all (ratio: 40/1)
- Chomikuj.pl:
 - Polish anti-piracy office (FOTA) is working on a collaboration protocol for removal of infringing content
 - However takedown of infringing content (especially “pull”) isn’t the best course of action (too much illegal content, very time-consuming and a lot of manual interventions)
 - Prime candidate for removal of entire website by hosting provider (Texas, USA)

Test results Poland (e-books)

Paulo Coelho	131	Pierre Dukan	31
Joanne K. Rowling	131	Robert Kiyosaki	15
Dan Brown	101	Nicholas Sparks	13
Stephanie Meyer	93	Krzysztof Chyla	11
Norman Davies	69	Manuela Gretkowska	8
Carlos Ruiz Zafon	42	Jostein Gaarder	7
Stanisław Dziwisz	37	Tadeusz Dołęga-Mostowicz	6
Wojciech Cejrowski	35	Mariusz Szczygieł	5
Stephen King	34	Bogusław Wołoszański	3
Andrzej Sapkowski	32	Krzysztof M. Pazdro	1

SINBAD goes Europe...

29

- **Rationale**

- Share expertise & best practices in member states concerned/involved
- Develop joint European webcrawler (on the basis of SINBAD and/or others)?
- Develop and extend joint scanning list (SINBAD: self-feeding)
- Solve technical problems (uniform metadata, batch file delivery, reduce manual intervention for larger countries/markets)
- Solve practical problems (ZIP-files, intranet wall for textbooks & STM, ...)
- Standardisation
- Set-up joint mandate or licensing scheme
- Reduce costs in member states concerned - no parallel development (“double dip”) & cheaper than commercial players’ services
- Determine annual membership fee split
- Provide reliable data for legal action targets (website blocking or take-down, relief or injunction rulings, ... - lawsuits to be filed at national level)
- Part of overhead income could be used to co-finance sustainable webcrawler
- Provide European Observatory with reliable factual data on piracy at EU level (to support lobbying for legal framework reform) + EU funding
- Provide survey companies with said data to determine real economic damage for RH (substitution effect?)
